

COMPANY POLICY

Our mission

We help to make strong connections between our customers and reliable welding technology.

Our offer is made of products from well-established manufacturers or from our own production. The selection is based on our detailed understanding of their properties and functions. Thanks to that we can offer good quality for reasonable price to our customers which brings them better results of their work. We support the growth of welding community in our welding schools and we try to make welding more popular among the public.

Key values

Honest offer

We offer the products that we use ourselves (e.g. in our welding schools, service and production center), so we are convinced about their quality.

Attention to detail

We are not satisfied with superficial information about products which we offer to our customers. We want to know everything because perfection is based on details.

Popularization

For us, welding is an amazing area of industry in which manual skills are combined with expert knowledge and sophisticated technology. We want to popularize its public prestige and make it attractive to all generations.

Building relationships

We do not „just sell welding equipment“. Our aim is to establish meaningful partnerships for mutual support and growth.

Informality

We respect authorities, we do not complicate our lives with complex rules, but we understand the importance of systemic approach. We like to have fun and laugh. We bring humor and fun into welding.

Commitments

- We are a complex supplier and manufacturer of professional technology for welding, cutting and grinding.
- We design and provide individualized solutions for welding, cutting and grinding.
- We provide trainings and education in welding, prepare companies for specific audits and offer welding supervisions and professional consulting.
- We make reliable welding and checking fixtures (jigs) that allow our customers to make great things.
- We establish mutually beneficial partnerships with our suppliers and together we try to satisfy our customers' needs.
- It is our goal to increase autonomy in our employees' decision making and responsibility.
- We manage all our processes rationally; their creation and modification are made carefully, based on collection of information and data.
- We want Artweld to be safe and healthy place for our employees to work and for customers to shop.
- We assess possible risks and we try to minimize or eliminate them.
- All our employees are invited to discussion about risks and safety issues.
- We do not want to pollute the environment so we take measures for its protection and careful usage of natural resources.
- We do not work with suppliers and customers who use any kind of forced labor or child labor.
- We are constantly looking for opportunities to improve our quality management systems, environmental protection and safety systems.
- We keep our word. We strictly comply with legal regulations and promises given to our customers and partners.

Team Artweld
